Final Project - Marine Life

- http://ksheth-marinelife.herokuapp.com/Marine_Life.php
 - o In order to access my website you must use this hyperlink.
- Implementation
 - For my website I tried to make it as easy to understand as possible. The user picks one thing to focus, and they get all the information on that one thing rather than being overwhelmed with an enormous amount of information.
 - I have my data displayed in the form of a paragraph so that it is easier to understand just what each attribute is representing.
 - I made sure that all of the different groups of data were separated so that what went together stayed together and there would be no confusion.

Admin Page
